I strongly urge the FCC and well as my elected officials from Missouri to reject NAB's petition 04-160. I pay for this private programming and am entitled to whatever programming I request. The instant traffic and weather I receive from XM is superior to my local stations. The NAB and local broadcasters are afraid of superior programming and this is the only way they know how to compete with XM. If they want me to use their services, put a better product on their airwaves.

Thank you.
